granted or  
pending

# MANAGED SECURITY SERVICES

## THREAT MANAGEMENT

<b>Managed Anti-Malware</b>	Built on Trustwave's patented-Malware Entrapment Engine, the Managed Anti-Malware service is so effective at preventing zero-day attacks it comes with the industry's first and only Zero-Malware guarantee.
<b>Managed Email Security</b>	Highly scalable and high performance content management and security focused email gateway solution provides protection from email-borne targeted attacks while eliminating the inconvenience of spam.
<b>Managed SIEM</b>	Trustwave's Managed Security Information and Event Management (SIEM) solution provides flexible service options to help any organisation meet their log management requirements.
<b>Managed UTM</b>	Trustwave's Managed Unified Threat Management (UTM) solution provides multiple network security controls consolidated in a single appliance fully managed by our experts. Available in packaged bundles designed specifically for the hospitality and retail industry.
<b>Managed IDS/IPS</b>	Trustwave's Managed Intrusion Detection and Prevention service alerts and reports on suspicious network traffic and can be configured to block the most dangerous threats.
<b>Managed WAF</b>	Trustwave Managed Web Application Firewall (WAF) delivers advanced web application security detection and protection, including coverage of the OWASP Top 10 Web application attacks.
<b>Managed Two-Factor Authentication</b>	Trustwave Two-Factor Authentication is a certificates based solution that provides on-demand replacement for traditional token-based authentication systems at a fraction of the cost.
<b>Managed Endpoint Protection</b>	An Integrated Security and Compliance platform delivering malware-protection, file-integrity monitoring, log-monitoring, rogue-device detection, payment-app detection and other services.
<b>Managed Network Access Control</b>	Trustwave Managed Network Access Control (NAC) enables granular control of network access and continuous monitoring of network endpoints to help prevent the spread of malware and other threats.
<b>Managed Threat Analysis</b>	Trustwave SIEM Enterprise and SIEM Operations Edition customers can enhance identification of emerging threats and leverage intelligence and learnt knowledge by adding our Managed Threat Analysis Service.
<b>Managed Encryption</b>	Trustwave Encryption protects information across the enterprise as an integrated solution with revolutionary encryption technology for full disk, removable media and email attachments.
<b>Incident Response</b>	Trustwave's SpiderLabs elite team of information security experts help identify sources of security breaches, minimize a breach's impact and mitigate future threats to the organization's IT assets.
<b>Incident Readiness</b>	Incident Preparedness for Information Security Teams. This service covers Computer Security Incident Response Plan (CSIRP), Computer Incident Response Team (CIRT) framework, First Responder Training, Attack Simulation Exercises, Attacker tool reverse engineering, scheduled intelligence briefings and hotline assistance.
<b>Forensics</b>	This service includes emergency response, computer misuse analysis, customer data sweep, evidence-handling and litigation support services among others.
<b>Retained Forensic Services</b>	With retained forensics services, Trustwave SpiderLabs experts are on standby to respond to a security breach and begin a forensics investigation the moment an incident occurs.

# VULNERABILITY MANAGEMENT

---

<b>Managed Security Testing</b>	Penetration Testing redefined with Trustwave's SpiderLabs unparalleled application and network penetration testing skills delivering on time, on budget and on demand via Trustwave's award-winning portal.
<b>Network Vulnerability Scanning</b>	Trustwave's vulnerability scanning and management service identifies an organisation's exposure to network borne malware attacks and compromises.
<b>Application Scanning</b>	Cloud-based dynamic application security testing (DAST) solution that identifies vulnerabilities in cloud and web applications.
<b>Database &amp; Big Data Scanning</b>	Trustwave's managed database scanning offers fully validated vulnerability scanning and reporting for an organisation's critical databases.
<b>Physical Security and Social Engineering</b>	Trustwave SpiderLabs experts work collaboratively to assess the physical security, controls testing and simulation of social engineering attacks to determine resiliency to these attack vectors.

# COMPLIANCE MANAGEMENT

---

<b>PCI DSS Compliance</b>	Trustwave holds the broadest suite of PCI-related qualifications of any vendor, including: <ul style="list-style-type: none"><li>Qualified Security Assessor (QSA)</li><li>Approved Scanning Vendor (ASV)</li><li>Payment Application QSA (PA-QSA)</li><li>Approved Payment Card Forensic Investigator (PFI)</li><li>Point-to-Point Encryption Assessor (P2PE)</li></ul>
<b>Risk Assessment</b>	Trustwave's Information Security Risk Assessment helps organisations make the best decisions regarding capital, resource and regulatory compliance costs of current and future information assets.
<b>Security Awareness Education</b>	Trustwave Security Awareness Education (SAE) provides targeted learning with role-based training on security best practices for staff in roles across the organisation.
<b>Merchant Compliance Program</b>	Trustwave's industry-leading PCI compliance program management for Acquiring Banks, Payment Processors and Franchise merchant portfolios. TrustKeeper provides numerous security and compliance services including PCI Self-Assessment Questionnaire (SAQ) and vulnerability scanning.
<b>Payment Application Assessment</b>	Trustwave performs assessments of Point of Sale systems to validate compliance with the PCI Payment Application Data Security Standard (PA-DSS).
<b>Policy &amp; Procedure Service</b>	Trustwave assists customers in developing security policies and procedures to facilitate compliance with industry and regulatory standards.
<b>Web Content Monitoring</b>	Designed primarily for Acquiring Banks, Payment Processors and Card Schemes, web content monitoring helps identify offensive and potentially illegal content on merchant websites enabling appropriate and timely action.

# SECURITY SOLUTIONS (LICENSED PRODUCTS)

## CONTENT & DATA SECURITY

---

- Web Anti-malware Gateway
- Email Anti-malware Gateway
- Web Filtering and Reporting
- Data Discovery
- Data Loss Prevention
- Email Content Manager

## NETWORK SECURITY

---

- Network Access Control
- Two Factor Authentication
- SSL Certificates
- Vulnerability Management

## SECURITY MANAGEMENT

---

- SIEM & Log Management
- Threat Analysis
- SOC Enablement

## DATABASE SECURITY

---

- Database & Big Data Scanning
- Enterprise Database Security & Management

## APPLICATION SECURITY

---

- Web Application Firewall
- Web & Cloud Application Scanning
- ModSecurity Rules and Support
- Mobile Application Scanning
- Web Content Monitoring
